

FH456 - 自動取得 IP

確認線路，來源網路與 WAN 連接，電腦與 LAN 連接

開啟瀏覽器 (網頁) · 在網址輸入 : 192.168.0.1
機器會自動檢測您的網路連線類型

機器檢測到您的網路連線類型為自動取得 IP

The screenshot shows the Tenda wireless router's web management interface. The browser address bar displays '192.168.0.1/index.html'. The page title is 'Tenda' and the language is set to '繁體中文'. The main content area is titled '網際網路連線狀態' (Internet Connection Status). It features a diagram showing a device connected to a router, which is connected to the internet. Below the diagram, it states '連線狀態: 您現在可以連線到網際網路!' (Connection status: You can now connect to the internet!).

Below this, the '線上設備和即時流量' (Online devices and real-time traffic) section shows 1 connected device, 0.0 KB/s download rate, and 0.0 KB/s upload rate.

The '系統資訊' (System Information) section is highlighted with a dashed orange box. It contains the following information:

連線類型	自動取得IP	WAN IP	172.16.15.102
連線時間	30s	子網路遮罩	255.255.0.0
WAN MAC	C8-3A:35:4F:CE:90	預設閘道	172.16.15.14
LAN IP	192.168.0.1	主要DNS伺服器	168.95.1.1

到無線網路設定您的無線網路名稱(亦可不更改)及密碼 設定加密模式，建議選擇 WPA2-PSK

The screenshot shows the '無線網路' (Wireless Network) settings page in the Tenda web interface. The '無線開關' (Wireless Switch) is turned on. The '無線網路名稱和密碼' (Wireless Network Name and Password) section shows the name 'Tenda_4FCE90' and a checkbox for '隱藏無線網路' (Hide wireless network) which is checked.

The '加密模式' (Encryption Mode) dropdown menu is open, showing the following options:

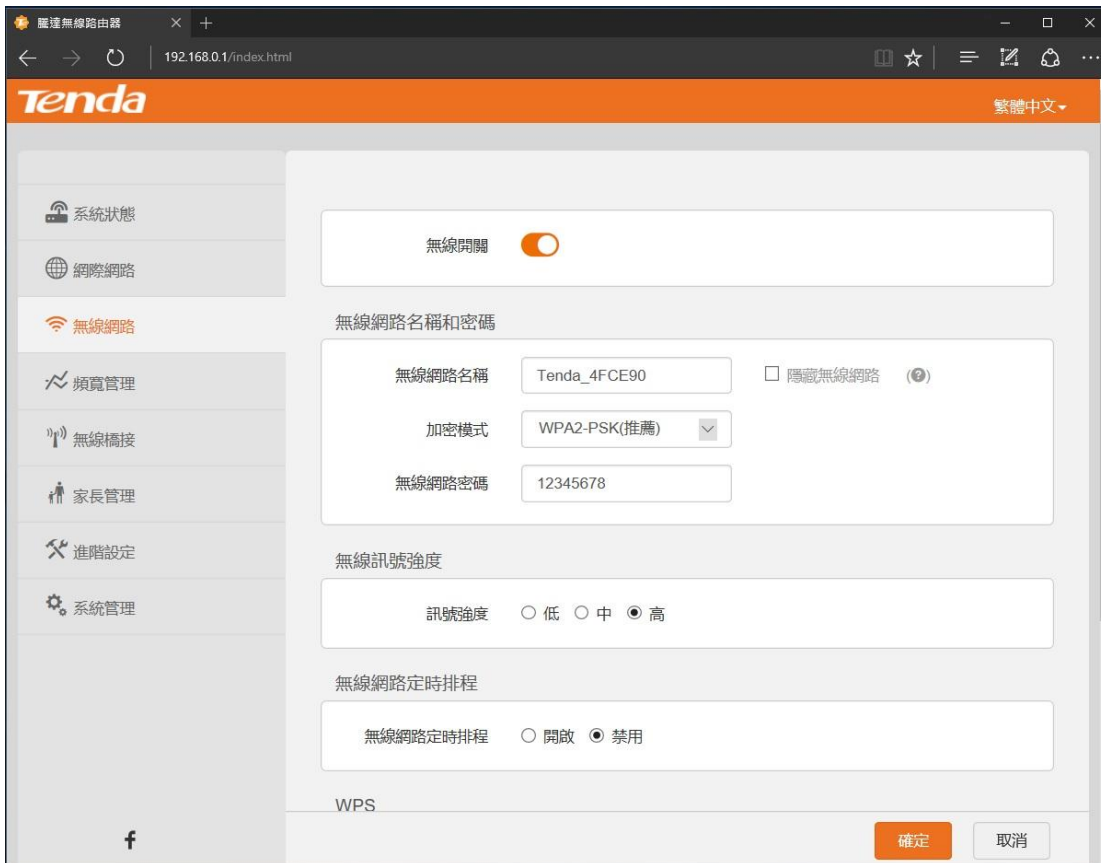

- 不加密
- WPA-PSK
- WPA2-PSK(推薦)
- WPA/WPA2-PSK混合模式

A red text annotation '加密模式建議選擇 WPA2-PSK' (Encryption mode recommended to choose WPA2-PSK) is placed next to the dropdown menu.

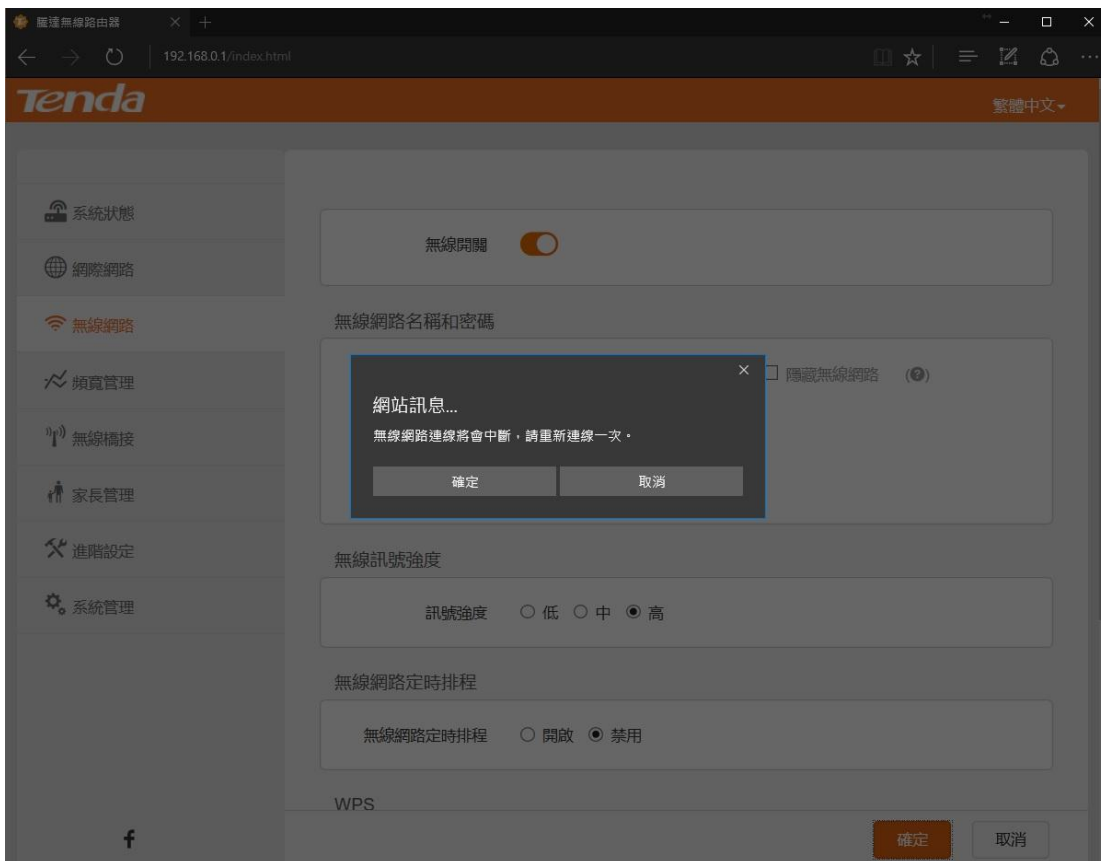

Below the encryption mode, the '無線訊號強度' (Wireless Signal Strength) is set to '高' (High). The '無線網路定時排程' (Wireless Network Scheduling) is set to '禁用' (Disabled). The 'WPS' (Wi-Fi Protected Setup) is also set to '禁用' (Disabled).

At the bottom right, there are '確定' (Confirm) and '取消' (Cancel) buttons.

設定完帳號密碼後點選確定

無線網路連線將會中斷，請重新連線一次，點選確定。

再到網際網路確認連線狀態，連線到網際網路就可以上網囉！

The screenshot shows the Tenda wireless router's web management interface. The browser address bar displays "192.168.0.1/index.html". The interface includes a sidebar with navigation options: 系統狀態, 網際網路, 無線網路, 頻寬管理, 無線橋接, 家長管理, 進階設定, and 系統管理. The main content area is titled "網際網路" and contains a configuration box for "連線類型" (Connection Type) with three radio buttons: "ADSL撥號(PPPoE)", "自動取得IP" (selected), and "固定IP". Below this, a note states: "適用於第四台業者、飯店、民宿等網路環境，電腦不需要進行任何設定就可上網的用戶". A red dashed box highlights the "連線狀態" (Connection Status) section, which displays the message: "您現在可以連線到網際網路！". Below the configuration box, red text reads: "確認連線狀態，連線到網際網路就可以上網囉！". At the bottom right, there are "確定" (Confirm) and "取消" (Cancel) buttons.
